Welcome Message

It is my great pleasure to present to you the third **Multi-specialty Medical Mega Conference** to be held on 13 - 14 April 2013 at the Langham Hotel Mongkok. To ride on the success of the last two conferences and with the conjoint effort of thirty-six medical societies, around one hundred topics which cover almost all specialties were organized into a comprehensive and informative program. The beauty of the multispecialty program is that one can not only update on development of your own specialty but also keep abreast on knowledge from other specialties and is very often the most interesting experience according to many participants. This year we have 24 themed sessions on various specialty subjects arranged in four parallels over the two days of conference. There is also one special debate session on Medical Manpower which is a highly controversial subject that seems to haunt the medical field forever.

You are therefore most welcome to participate in this conference. Join this great annual medical event and share the fun of updating knowledge, contributing your views, and meeting your colleagues all at the same time. Please do not miss this once a year opportunity and register now for the conference.

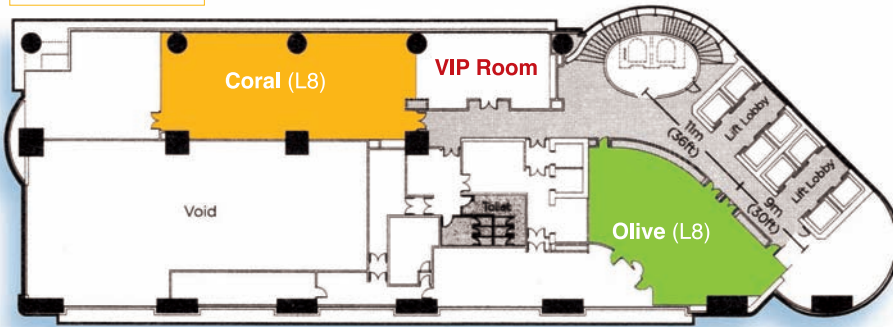

Dr KWOK Po Yin, Samuel
Conference Chairman
