Welcome Message

On behalf of the Organising Committee, we are pleased to invite you to participate in the 13th Regional Osteoporosis Conference (ROC) to be held on 26-27 May 2012 in the Hong Kong Convention & Exhibition Centre.

Osteoporosis is now recognized as a major health problem worldwide. Fracture is the most undesirable complication of osteoporosis and patients with fracture not only would have an impaired quality of life but also have a shorted life expectancy. The primary care sector is the ideal setting to identify high risk individuals so that early prevention and treatment of bone loss can be instituted to reduce the risk of the dreadful complication of fracture. This year OSHK has great pleasure to have the Hong Kong Doctors Union as the co-organiser and a special joint OSHK-HKDU Symposium should lay some guidance to the primary care physicians in the approach to osteoporosis patients.

Long-term medical treatment for osteoporosis is another hot topic in debate. The ROC this year will have a session on atypical femur fracture, which hopefully will shed some new insights into this important issue. In addition, we do have a number of overseas and local experts to review on current anti-osteoporosis drug treatment including old and new drugs.

We would also like to invite you to submit abstracts for presentation in the poster session. A Young Investigator Award would be presented to the best poster from our young fellows.

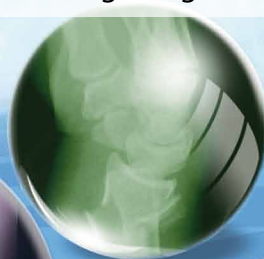

We do reassure you to have a fruitful gain from the ROC this year. We look forward to welcoming you to the HKCEC for this exciting conference.

Concurrent Workshops

Hands-on Interactive Workshop on BMD Scans

Prior registration required

26-27 May 2012 (Saturday - Sunday) | Room S425, 4/F, Phase 1, Hong Kong Convention & Exhibition Centre

An intensive Osteoporosis Assessment workshop designed for radiographers or ISCD certified professionals to seek hands-on experience to their BMD analysis precision. After a brief introductory session on the learning objectives of the workshop and on how to use the system, the participants have to analyze a dataset which consists of 15 cases. Thereafter they can receive the model answer of each case, and discuss the cases with the medical expert(s) afterwards. Participants can take part in multiple sessions, each time reading a different dataset.

Workshop on Kyphoplasty Treatment for Vertebral Compression Fractures

Prior registration required

26-27 May 2012 (Saturday - Sunday) | Room S426, 4/F, Phase 1, Hong Kong Convention & Exhibition Centre

A workshop is designed for orthopaedic surgeons to learn more about kyphoplasty treatment, a minimally invasive treatment option, which addressed both the deformity and the pain caused by vertebral compression fractures. This workshop is intended to provide an overview to orthopaedic surgeons regarding the approved or cleared uses, patient selection, general surgical technique and procedure of kyphoplasty treatment. Participants may have the chance to learn how to use this instrument set during the workshop. Participants can also raise any questions related to this instrument set during the discussion session.
